Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 20-22, 29-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Cha (US 6,831,814). (As per claims 20 & 29) Cha discloses a rotary disk storage device including a suspension assembly, the storage device including a rotary disk (refer to FIGs. 4-5) 22a-d; a magnetic head 25 for reading/writing to the disk(s); a slider 26 mounted with the head; an actuator mechanism 28a-d supporting a suspension assembly 31; wherein the suspension assembly includes a load beam 31 and a flexure 103 (refer to FIG. 6) provided with a metal layer, e.g., stainless steel, and supporting the slider, said flexure comprising: a first supporting area (adjacent 103 in the figure) composed of said metal layer and supported by said load beam (see FIG. 7); a flexure tongue 110/112 including a second supporting area 112 that supports said slider, a dimple contact point 67 (FIG. 3), and a leading edge, e.g., left side of drawing, and formed of part of said metal layer; and at least one supporting structure 100/121 or 101/123 extending from the first supporting area to a leading edge side of the flexure tongue, wherein the leading edge side consists of the leading edge of the flexure tongue and side edges of the flexure tongue existing between a center of a mounting position of said slider and the leading edge, and wherein the at least one supporting structure is a sole structure for supporting said flexure tongue

Art Unit: 2627

(as shown in the above identified FIGs.); (as per claim 21) wherein the leading edge is disposed on a leading end side of the load beam, e.g., left side of drawings, with respect to a trailing edge, e.g., right side; (as per claim 22) wherein the leading edge is disposed on a supporting end side of the load beam with respect to a trailing edge; (as per claim 30) Cha further shows a ramp 33 in which the slider is retracted; (as per claim 31) wherein the actuator mechanism turns about a pivot shaft 30 above a surface of the rotary disk (see FIG. 4).

Allowable Subject Matter

3. Claims 1-19, 23-28 are allowable over the prior art as previously set forth.

Response to Amendment

4. Applicant's arguments with respect to claims 20-22, 29-31 have been considered but are moot in view of the new ground(s) of rejection.

A...Newly cited reference to Cha is considered to encompass all of the newly added limitations, as the amended claims do not presently overcome the newly applied art as described, supra.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2627

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
